# Pigułka Wiedzy

```java
String[] names = new String[10];
String[] values = new String[]{1, 2, 3, 4};
names[0] = "Shiro"; // first item
int max = values[3];
int[][] chessBoard = new int[8][8];
int size = values.length;
int lastIndex = names.length - 1;
```

```java
public static void sumOf(int... values) // implementation
```
